

Emotional Intelligence – The essential skillset for the age of AI

In the age of automation and AI,
Emotional intelligence is a
“must-have” skill for sustainability and scalability.

- 74% of executives and 58% of non-supervisory employees believe EI will become a “must-have” skill for all employees

By when do you think emotional intelligence skills will become a “must-have” skill?

Executives: refers to senior management, mid management and HR, Employees: refers to employees in non-supervisory roles.

Demand for emotional intelligence skills
will rise six times on average in the next three to five years

- This increase in demand will be the highest in India (8.3 times), followed by the US (6.4 times)
- Demand for EI skills will be high across all sectors, the highest being financial services (insurance and retail banking).

Organizations do not consider emotional intelligence skills while assessing, hiring or providing feedback to employees.

Employees in non-supervisory roles are not assessed or appraised adequately for their emotional intelligence skills.

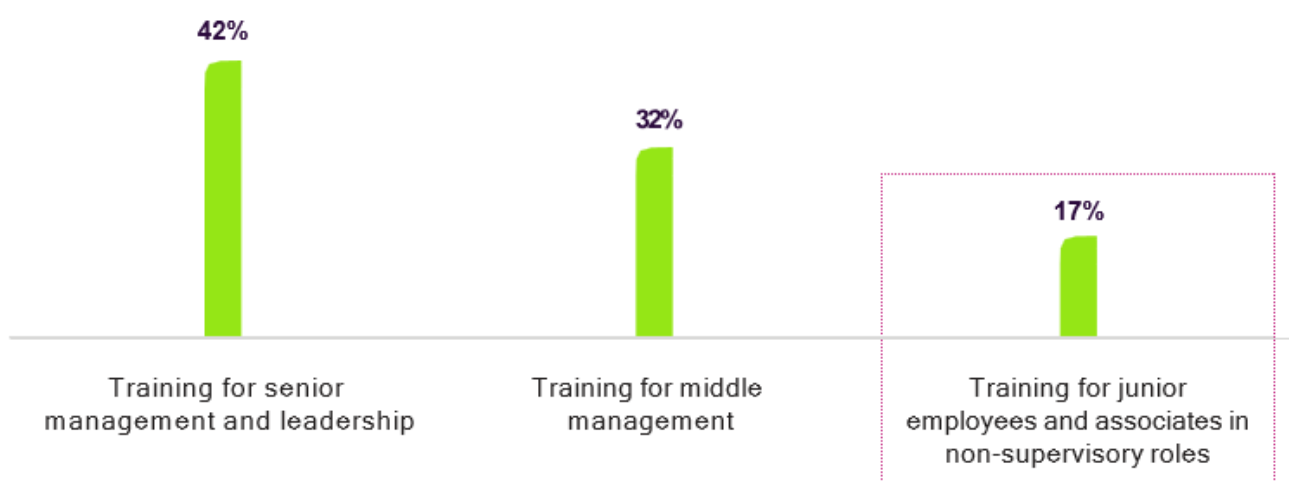

Source: Capgemini Research Institute, Emotional Intelligence Research, Executive Survey, August–September 2019, N=750 executives.

- Nearly 70% of non-supervisory employees agree that they are willing to improve their EI skills, as long as they are adequately appraised for it.

- In contrast, only 26% of organizations consider EI skills while providing feedback or appraising employees in non-supervisory roles.

Fewer than one in five organizations train non-supervisory employees on emotional intelligence

Share of organizations conducting training in emotional intelligence.
